

SUMENTA

Efficacy of Sumenta in patients with mild to moderate depression

Published in PSYCHIATRY UPDATE VOLUME 11(no. 5).....Dr. M. Haridas and Dr. Y. Matcheswala at J. J. Group of Hospitals, Mumbai

A randomized, open label, non-comparative trial was conducted by Dr. M. Haridas and Dr. Y. Matcheswala at J. J. Group of Hospitals, Mumbai. Fifty male and female patients were enrolled. Sumenta tablet was administered as 1 tablet twice a day for 8 weeks.

Sumenta tablets showed significant antidepressant activity in mild to moderate cases of depression.
